Race/ethnicity unknown					
Total (Men and Women)	41%	31%	32%	33%	34%

Notes:

1. This report presents graduation rates as reported to the National Center for Education Statistics (NCES). Graduation rates of students on athletic-related financial aid are also reported to the National Collegiate Athletics Association (NCAA).
2. Graduation rate information is based on the standard cohort of entering students as defined by the US Department of Education. This cohort is very traditional in that it includes first-time, full-time, degree-seeking undergraduates. Transfer and part-time students are excluded. Two specific groups of students who are not actually "first-time" are included in the cohort: students who took college course while still in high school and students who took college courses during the summer semester directly before the fall semester being reported.
3. Bachelor's degree graduation rate is the percentage of students from a cohort of entering students in a given fall who earned a bachelor's degree within six years. Students who died or were totally and permanently disabled, left school to serve in the armed forces, left to serve with a foreign aid service of the federal government, such as the Peace Corps, and those who left to serve on official church mission are excluded from graduation rate calculations.
